Production (ex-modern sector) declined by 5.4% in Q4 following seven consecutive quarters of growth

Manufacturing PMI improves further at the start of Q1, suggesting the sector started the year on a firmer footing

Services index declines by 0.8% in Q4 following Q3's strong 3.9% growth. In part reflects contractions in IT and professional service sectors

Services PMI increases to 64 in January, a 9½ yr high. Suggests sector had a strong start to the year, after slowing slightly in Q4

Car sales rise sharply in January (on 2016 reg. plate) show strong YoY growth of 33%

Core retail sales remained strong in Q4 (+1.6%). Data show growth relatively broad based, though mild weather did impact fuel and clothes sales

Construction PMI jumps in January. Housing activity at best level since October'14, while new orders component suggests stronger momentum

Registrations increased by 67% in 2015; but still weak overall. YoY growth negative in Q4

Commencements continue to improve on a 12mth cumulative basis. YoY comparison distorted by base effects from 2014

12,666 completions last year—well below estimated demand

YoY growth in mortgage approvals and housing transactions negative in Q4 may reflect impact from new Central Bank mortgage rules as well as limited sale stock

House price inflation was at 6.6% in Dec'15 vs 16.3% in Dec'14. Mainly due to sharp slowdown in Dublin price growth (2.6% vs 22.3%) on Central Bank regulations. Ex-Dublin price growth broadly stable (10.2% Dec'15 and Dec'14)

Rents continue to rise strongly in January (+1.2%)—now 3.1% above previous peak

Lower mortgage rates mean affordability remains accommodative

	Jun-15	Jul-15	Aug-15	Sep-15	Oct-15	Nov-15	Dec-15	Jan-16	CPI inflation holds at 0.1% in
