

AIB Green Bond Impact Report – FY2021

March 2022

AIB Green Bond Impact Report

*In accordance with the ICMA Harmonized Framework for Impact Reporting¹
(based on the portfolio approach)*

Portfolio Date: 31 December 2021

In accordance with the AIB Green Bond Framework² dated December 2021, this document provides:

1. A description of the Eligible Green Projects;
2. The breakdown of the Eligible Green Projects by nature of what is being financed;
3. Metrics regarding Eligible Green Projects' environmental impacts.

1. Description of Green Projects

AIB, at its discretion but in accordance with the ICMA Green Bond Principles³, will allocate the net proceeds of the Green Bonds issued under the Framework, to a loan portfolio of new and existing loans in certain Eligible Green Categories.

➤ Eligible Green Categories:

- **Green Commercial Buildings:** Loans to finance or refinance development, construction, operation, and maintenance of:

Green Commercial Buildings in Ireland:

- a) Existing commercial buildings built up to and including 31st December 2020, belonging to the top 15% low carbon buildings in the local context⁴;
- b) New commercial buildings built from 1st January 2021 onwards, that have a primary energy demand at least 10% lower than what is required by the local Nearly Zero-Energy Building (NZEB) regulation⁵ 6;
- c) Refurbished commercial buildings with at least a 30% improvement in energy efficiency⁷:
When such an improvement is derived from BER labels, a minimum floor of a "C3"
BER label will be implemented.

Green Commercial Buildings in the UK:

- a) New or existing commercial buildings in the UK, belonging to the top 15% low carbon buildings in the local context (i.e. England & Wales, Scotland and Northern Ireland)⁸ 9;

³ <https://www.icmagroup.org/green-social-and-sustainability-bonds/green-bond-principles-gbp/>

⁴ Based on publicly issued governmental statistical data, Irish commercial buildings with BER rating of A, B1 and B2 are in scope (see methodology document [here](#)). Buildings purchased or leased in Ireland from 2015 by a public body are also considered part of the top 15%, as these are required by regulation to have BER label "B2" and better.

⁵ For the acquisition of buildings where the building is a large non-residential building with an effective rated output for heating systems, systems for combined air conditioning and ventilation of over 290 kW it is efficiently operated through energy performance monitoring assessment. And for the construction of new buildings larger than 5000m², upon completion, the building resulting from the construction undergoes testing for air-tightness and thermal integrity, and any deviation in levels of performance set at the design stage or defects in the building envelop are disclosed to investors and clients. As an alternative; where robust and traceable quality control processes are in place during the construction process this is acceptable as an alternative to thermal integrity testing. Also for the construction of new buildings larger than 5000m², the life cycle Global Warming Potential of the building resulting from the construction has been calculated for each stage in the life cycle and is disclosed to investors on demand.

⁶ In line with the [EU EPBD directive](#), Ireland carries out a cost optimal analysis to define NZEB requirements. AIB will calculate the NZEB-10% threshold as per the official cost optimal analysis, as published by the Department of Housing, Local Government and Heritage. At the time of writing, the cost optimal analysis for residential and non-residential buildings can be found [here](#) and [here](#), respectively.

⁷ Or alternatively, renovation complying with applicable requirements for major renovations as set in the applicable national and regional building regulations for 'major renovation' implementing Directive 2010/31/EU.

⁸ Based on publicly issued governmental statistical data, English and Welsh commercial buildings with EPC rating of A+, A and B are in scope. Scottish commercial buildings with EPC rating of Climate Neutral ("CN"), A and B are in scope. See methodology document [here](#).

⁹ In accordance with the EU Climate Delegated Act, buildings built from the 1st January 2021 should meet the 'NZEB – 10%' criterion, meaning that the net primary energy demand of the buildings must be at least 10% lower than the primary energy demand resulting from the relevant NZEB requirements. In the UK, a definition for what constitutes a 'NZEB' is unclear currently; this is likely to remain the case in the future, given the UK has left the EU.

- b) Refurbished commercial buildings in the UK with a least a 30% improvement in energy efficiency¹⁰:
When such an improvement is derived from EPC labels, a minimum floor will be implemented for the considered building. The floor will be one step below the lowest defined threshold to be part of the top 15% in the local context¹¹.

Green Commercial Buildings in Ireland and the UK:

- a) New or existing commercial buildings which received at least one or more of the following classifications:
 - BREEAM 'Excellent' or higher
 - LEED 'Gold' or higher
 - DGNB 'Gold' or higher
- **Green Residential Buildings:** Loans to finance or refinance development, construction, operation, and maintenance of:

Green Residential Buildings in Ireland:

- a) Existing residential buildings built up to and including 31st December 2020, belonging to the top 15% low carbon buildings in the local context¹²;
- b) New residential buildings built from 1st January 2021 onwards, that have a primary energy demand at least 10% lower than what is required by the local Nearly Zero-Energy Building (NZEB) regulation^{13 14};
- c) Refurbished residential buildings with at least a 30% improvement in energy efficiency¹⁵:
When such an improvement is derived from BER labels, a minimum floor of a "C3" BER label will be implemented.
- **Renewable Energy:** Loans to finance or refinance equipment, development, manufacturing, construction, operation, distribution and maintenance of renewable energy generation:

Renewable Energy assets in Ireland, the UK and across the EU:

- a) Solar Energy: Photovoltaics (PV), concentrated solar power (CSP) and solar thermal facilities;
- b) Wind Energy: Onshore and offshore wind energy generation facilities and other emerging technologies;
- c) Anaerobic digestion of bio-waste¹⁶: treatment of bio-waste through anaerobic digestion (AD) with resulting production and energetic utilization of biogas (electricity/heat generation). Energy crops and non-waste feedstock are excluded.
- **Clean Transportation:**

¹⁰ Or alternatively, renovation complying with applicable requirements for major renovations as set in the applicable national and regional building regulations for 'major renovation' implementing Directive 2010/31/EU.

¹¹ Based on publicly issued governmental statistical data, this would correspond to a "C" label in England & Wales and Scotland.

¹² Based on publicly issued governmental statistical data, Irish residential buildings with BER rating of A, B1 and B2 are in scope, corresponding to buildings completed from 2015 (see methodology document [here](#)).

¹³ For the acquisition of buildings where the building is a large non-residential building with an effective rated output for heating systems, systems for combined air conditioning and ventilation of over 290 kW it is efficiently operated through energy performance monitoring assessment. And for the construction of new buildings larger than 5000m², upon completion, the building resulting from the construction undergoes testing for air-tightness and thermal integrity, and any deviation in levels of performance set at the design stage or defects in the building envelope are disclosed to investors and clients. As an alternative; where robust and traceable quality control processes are in place during the construction process this is acceptable as an alternative to thermal integrity testing. Also for the construction of new buildings larger than 5000m², the life cycle Global Warming Potential of the building resulting from the construction has been calculated for each stage in the life cycle and is disclosed to investors on demand.

¹⁴ In line with the [EU EPBD directive](#), Ireland carries out a cost optimal analysis to define NZEB requirements. AIB will calculate the NZEB-10% threshold as per the official cost optimal analysis, as published by the Department of Housing, Local Government and Heritage. At the time of writing, the cost optimal analysis for residential and non-residential buildings can be found [here](#) and [here](#), respectively.

¹⁵ Or alternatively, renovation complying with applicable requirements for major renovations as set in the applicable national and regional building regulations for 'major renovation' implementing Directive 2010/31/EU.

¹⁶ Relevant EU Taxonomy criteria for AD projects will be respected.

Zero emissions vehicles and supporting infrastructure:

- a) Fully electric, hydrogen or otherwise zero emissions vehicles for the transportation of passengers;
- b) Infrastructure to support zero emissions vehicles including but not limited to EV charging and hydrogen fuelling stations.

➤ **Contribution to EU Environmental Objectives:**

Eligible Projects substantially contribute to the achievement of the **EU Environmental Objective n. 1: Climate Change Mitigation**, via improving energy efficiency in all sectors, except energy generation using solid fossil fuels, and at all stages of the energy chain, in order to reduce primary and final energy consumption (sub-objective 1.b), generating, storing, distributing or using renewable energy in line with the Renewable Energy Directive, including through using innovative technology with a potential for significant future savings or through necessary reinforcement of the grid (sub-objective 1.a) and increasing clean or climate-neutral mobility (sub-objective 1.c).

➤ **Alignment with the UN Sustainable Development Goals (UN SDGs):**

Green Bonds issued under this Green Bond framework directly advance the following SDGs:

- SDG 7: Affordable and Clean Energy (Target 7.2, 7.3)
- SDG 9: Industry, Innovation and Infrastructure (Target 9.4)
- SDG 13: Climate Action (Target 13.1)

2. Breakdown of Green projects by nature of what is being financed

AIB Eligible Green Project Portfolio is composed by financial assets (eligible loans), selected in accordance with the Eligibility Criteria set out in the Framework.

3. Metrics regarding projects' environmental impacts: Portfolio based green bond report in accordance with the ICMA Harmonized Framework for Impact Reporting (June 2021)

AIB has relied on models and methodologies created by specialised consultant Carbon Trust¹⁷ to assess the impact of the Eligible Green categories, together forming the Eligible Green Project Portfolio.

The Eligible Green Project Portfolio is assessed regarding the following environmental impacts:

- **Green Buildings:**
 - Estimated annual energy consumption (in KWh/year) and estimated annual avoided energy consumption (in KWh/year)
 - Estimated annual avoided emissions (in tons CO₂/year)

- **Renewable Energy:**
 - Total installed capacity (in MW)
 - Estimated annual avoided emissions (in tons of CO₂/year)

- **Clean Transportation:**
 - Annual GHG emissions avoided (in kg CO₂/year)
 - Number of battery electric vehicles (BEVs) deployed

¹⁷ The Carbon Trust Impact Methodology can be found at: <https://aib.ie/investorrelations/debt-investor/green-bonds/supporting-documents>

Portfolio Date: 31 December 2021¹⁸

Eligible ICMA Project Category	Number of Eligible Projects / Buildings	Eligible portfolio (EUR)	Share of Total Financing	Eligibility for Green Bonds	Est. annual avoided emissions (tCO ₂ /year)	Total installed capacity (MW)	Est. annual energy consumption (kWh/year)	Est. annual avoided energy consumption (kWh/year)
<i>a/</i>		<i>b/</i>	<i>c/</i>	<i>d/</i>	<i>e/</i>	<i>f/</i>	<i>g/</i>	<i>h/</i>
Green Buildings	53	1,227,017,798	48%	100%	37,973	-	94,953,032	145,190,907
Renewable Energy	49	1,318,796,083	51%	100%	1,152,404	814	-	-
Clean Transportation	783	20,735,377	1%	100%	779	-	2,201,691	-
Total	885	2,566,549,258	100%	100%	1,191,156	814	97,154,723	145,190,907

Portfolio based green bond report in accordance with the ICMA Harmonized Framework for Impact Reporting (version June 2021)

a/ Eligible Category

b/ Signed amount represents the amount legally committed by the issuer for the portfolio or portfolio components eligible for Green Bond Financing

c/ This is the share of the total portfolio cost that is financed by the issuer per Eligible Category

d/ This is the share of the total portfolio costs that is eligible for Green Bond issuances

e/ f/ g/ h/ Impact indicators

- Estimated annual avoided emissions (tCO₂/year)
- Total installed capacity (MW)
- Estimated annual energy consumption (kWh/year)
- Estimated annual avoided energy consumption (kWh/year)

¹⁸ Combined impacts of operational and non-operational projects portfolio, as of December 31, 2021.

THIS DOCUMENT MAY CONTAIN OR INCORPORATE BY REFERENCE PUBLIC INFORMATION NOT SEPARATELY REVIEWED, APPROVED OR ENDORSED BY AIB AND ACCORDINGLY, NO REPRESENTATION, WARRANTY OR UNDERTAKING, EXPRESS OR IMPLIED, IS MADE AND NO RESPONSIBILITY OR LIABILITY IS ACCEPTED BY AIB AS TO THE FAIRNESS, ACCURACY, REASONABLENESS OR COMPLETENESS OF SUCH INFORMATION.

THIS DOCUMENT MAY CONTAIN STATEMENTS ABOUT FUTURE EVENTS AND EXPECTATIONS THAT ARE FORWARD LOOKING STATEMENTS. ANY SUCH STATEMENTS SPEAK ONLY AS AT THE DATE OF THIS FRAMEWORK. NONE OF THE FUTURE PROJECTIONS, EXPECTATIONS, ESTIMATES OR PROSPECTS IN THIS DOCUMENT SHOULD BE TAKEN AS FORECASTS OR PROMISES NOR SHOULD THEY BE TAKEN AS IMPLYING ANY INDICATION, ASSURANCE OR GUARANTEE THAT THE ASSUMPTIONS ON WHICH SUCH FUTURE PROJECTIONS, EXPECTATIONS, ESTIMATES OR PROSPECTS HAVE BEEN PREPARED ARE CORRECT OR EXHAUSTIVE OR, IN THE CASE OF THE ASSUMPTIONS, FULLY STATED IN THE DOCUMENT. AIB HAS NO OBLIGATION AND UNDERTAKES NO OBLIGATION TO UPDATE, MODIFY OR AMEND THIS DOCUMENT, THE STATEMENTS CONTAINED HEREIN TO REFLECT ACTUAL CHANGES IN ASSUMPTIONS OR CHANGES IN FACTORS AFFECTING THESE STATEMENTS OR TO OTHERWISE NOTIFY ANY ADDRESSEE IF ANY INFORMATION, OPINION, PROJECTION, FORECAST OR ESTIMATE SET FORTH HEREIN CHANGES OR SUBSEQUENTLY BECOMES INACCURATE.

THIS DOCUMENT IS NOT INTENDED TO BE AND SHOULD NOT BE CONSTRUED AS PROVIDING LEGAL OR FINANCIAL ADVICE. IT DOES NOT CONSTITUTE AN OFFER OR INVITATION TO SELL OR ANY SOLICITATION OF ANY OFFER TO SUBSCRIBE FOR OR PURCHASE OR A RECOMMENDATION REGARDING ANY SECURITIES. NOTHING CONTAINED HEREIN SHALL FORM THE BASIS OF ANY CONTRACT OR COMMITMENT WHATSOEVER AND IT HAS NOT BEEN APPROVED BY ANY SECURITY REGULATORY AUTHORITY.

THE DISTRIBUTION OF THIS DOCUMENT AND OF THE INFORMATION IT CONTAINS MAY BE SUBJECT TO LEGAL RESTRICTIONS IN SOME COUNTRIES. PERSONS WHO MIGHT COME INTO POSSESSION OF IT MUST INQUIRE AS TO THE EXISTENCE OF SUCH RESTRICTIONS AND COMPLY WITH THEM.

THE INFORMATION IN THIS DOCUMENT HAS NOT BEEN INDEPENDENTLY VERIFIED.

THE ADDRESSEE IS SOLELY LIABLE FOR ANY USE OF THE INFORMATION CONTAINED HEREIN AND AIB SHALL NOT BE HELD RESPONSIBLE FOR ANY DAMAGES, DIRECT, INDIRECT OR OTHERWISE, ARISING FROM THE USE OF THIS DOCUMENT BY THE ADDRESSEE.

THIS FRAMEWORK REPRESENTS CURRENT AIB POLICY AND INTENT, IS SUBJECT TO CHANGE AND IS NOT INTENDED NOR CAN BE RELIED ON, TO CREATE LEGAL RELATIONS, RIGHTS OR OBLIGATIONS.

ANY DECISION TO PURCHASE ANY AIB GREEN BONDS SHOULD BE MADE SOLELY ON THE BASIS OF THE INFORMATION TO BE CONTAINED IN ANY OFFERING DOCUMENT OR PROSPECTUS PRODUCED IN CONNECTION WITH THE OFFERING OF SUCH BONDS.

PROSPECTIVE INVESTORS ARE REQUIRED TO MAKE THEIR OWN INDEPENDENT INVESTMENT DECISIONS.

NO REPRESENTATION IS MADE AS TO THE SUITABILITY OF ANY AIB GREEN BONDS TO FULFIL GREEN CRITERIA REQUIRED BY PROSPECTIVE INVESTORS. EACH POTENTIAL PURCHASER OF AIB GREEN BONDS SHOULD DETERMINE FOR ITSELF THE RELEVANCE OF THE INFORMATION CONTAINED OR REFERRED TO IN THIS FRAMEWORK OR THE RELEVANT BOND DOCUMENTATION FOR SUCH AIB GREEN BONDS REGARDING THE USE OF PROCEEDS AND ITS PURCHASE OF AIB GREEN BONDS SHOULD BE BASED UPON SUCH INVESTIGATION AS IT DEEMS NECESSARY.

AIB HAS SET OUT ITS INTENDED POLICY AND ACTIONS IN THIS FRAMEWORK IN RESPECT OF USE OF PROCEEDS, PROJECT EVALUATION AND SELECTION, MANAGEMENT OF PROCEEDS AND INVESTOR REPORTING, IN CONNECTION WITH AIB GREEN BONDS. HOWEVER, IT WILL NOT (I) GIVE RISE TO ANY CLAIM OF AN INVESTOR AGAINST AIB OR (II) CONSTITUTE AN EVENT OF DEFAULT UNDER THE GREEN BONDS OR (III) LEAD TO AN OBLIGATION OF AIB TO REDEEM SUCH GREEN BONDS OR BE A RELEVANT FACTOR FOR AIB IN DETERMINING WHETHER OR NOT TO EXERCISE ANY OPTIONAL REDEMPTION RIGHTS IN RESPECT OF ANY GREEN BONDS; OR (IV) WHERE APPLICABLE, AFFECT THE QUALIFICATION OF SUCH GREEN BONDS FOR REGULATORY PURPOSES, IF AIB FAILS TO ADHERE TO THIS FRAMEWORK, WHETHER BY FAILING TO FUND OR COMPLETE ELIGIBLE GREEN PROJECTS OR OTHERWISE.

IN ADDITION, IT SHOULD BE NOTED THAT ALL OF THE EXPECTED BENEFITS OF THE PROJECTS AS DESCRIBED IN THIS FRAMEWORK MAY NOT BE ACHIEVED. FACTORS INCLUDING (BUT NOT LIMITED TO) MARKET, POLITICAL, SOCIAL AND

ECONOMIC CONDITIONS (INCLUDING (BUT NOT LIMITED TO) THE COVID-19 PANDEMIC AND THE CONSEQUENCES THEREOF), CHANGES IN GOVERNMENT POLICY (WHETHER WITH A CONTINUITY OF THE GOVERNMENT OR ON A CHANGE IN THE COMPOSITION OF THE GOVERNMENT), CHANGES IN LAWS, RULES OR REGULATIONS, THE LACK OF AVAILABLE SUITABLE PROJECTS BEING INITIATED, FAILURE TO COMPLETE OR IMPLEMENT PROJECTS AND OTHER CHALLENGES, COULD LIMIT THE ABILITY TO ACHIEVE SOME OR ALL OF THE EXPECTED BENEFITS OF THESE INITIATIVES, INCLUDING THE FUNDING AND COMPLETION OF ELIGIBLE GREEN PROJECTS. IN ADDITION, EACH ENVIRONMENTALLY FOCUSED POTENTIAL PURCHASER OF AIB GREEN BONDS SHOULD BE AWARE THAT ELIGIBLE GREEN PROJECTS MAY NOT DELIVER THE GREEN BENEFITS ANTICIPATED, AND MAY RESULT IN ADVERSE IMPACTS. ON THIS BASIS, ALL AND ANY LIABILITY, WHETHER ARISING IN TORT, CONTRACT OR OTHERWISE WHICH ANY PURCHASER OF AIB GREEN BONDS OR ANY OTHER PERSON MIGHT OTHERWISE HAVE IN RESPECT OF THIS FRAMEWORK OR ANY AIB GREEN BONDS AS A RESULT OF ANY FAILURE TO ADHERE TO OR COMPLY WITH THIS FRAMEWORK IS HEREBY DISCLAIMED TO THE FULLEST EXTENT PERMITTED BY LAW.
